Forecast for Thursday 08 Jun 2023

Weather: Staying generally dry, with again early cloud clearing and breaking to give widespread sunshine into the afternoon, tempered by a fresh easterly breeze.

Chance of cloud-free hill tops above 600m: 50% in the east to start, 80% in the west, becoming 90% for all into the afternoon.

Low Cloud and visibility: Cloud widespread in the east, patchier in the west, covering some higher tops of the park to start with bases of around 500-600m. Cloud increasingly breaking through the morning, clearing away from the west to leave clear skies for many by the afternoon. Visibility generally good outside of any early cloud at height.

*Level above which ground is expected to be frozen/snow is expected to settle.

Meteorologist's View

High UV levels likely, with sun protection essential. Care should also be taken if heading out onto the hills early, with temperatures at height feeling cold in the fresh easterly winds, adequate layers recommended.

Forecast for Friday 09 Jun 2023

Weather: Similar to previous days, with overnight cloud likely clearing to leave another dry sunny day. Brisk easterly winds persisting.

Maximum wind: Easterly 20mph gusting 30mph.

Chance of cloud-free hill tops above 600m: 60% in the east to start, becoming 95% for all into the afternoon.

Low Cloud and visibility: Some early areas of cloud, with bases once again around 600-700m, particularly in the east of the park to start. Cloud breaking through the morning to leave largely clear skies by the afternoon. Visibility generally good outside of any early cloud at height.

Temperature: **Valleys:** 8 deg C becoming 18 deg C.
At 600m: 5 deg C becoming 12 deg C.
Freezing level: Above summits.
